June 7, 2022

Dear Club Members:

We have instituted the following rates effective July 1, 2022. These are all "wet" rates.

Aircraft		Hourly	10 hour block	20 hour block
C-172	N19897	125.00	120.00	115.00
C-172	N79910	125.00	120.00	115.00
B-19	N9728L	125.00	120.00	115.00
T-41 (R172E)	N69RA	175.00	170.00	165.00

We at Acampo Flying Club are very grateful for your support and trust in keeping flying affordable and within everyone's means. When we started the Club in 2005 fuel prices were \$3.509/gallon, on June 19, 2021, fuel prices were \$4.849, today fuel prices are \$6.999 and astronomical 44.3% increase in one year. Also, our maintenance hourly rate was \$75.00 per hour, now it's \$108.00 per hour. Cost to Over Haul an 0-320 was \$21,000.00, now it's \$26,000.00. We have absorbed those increases over the years as the markets have fluctuated. We have been informed by the airport owner that he does foresee's fuel prices going up again. Our wet rates are now based on \$6.999/gallon.

Should your flight excursion take you out of the area whereas fuel prices are above the \$6.999/gallon set rate, you will be credited at our airport rate of \$6.999/gallon. If the actual receipt is less, you will be credited for said amount. All fuel costs in excess of \$6.999/gallon will be "out of pocket" expenses are not reimbursed by the club. So, please make sure you perform a fuel price comparison on AirNav prior to your flight.

**All block rates must be paid in advance. If you do not pay in advance, you will be charged at the hourly rate. Also, if you do not have block time paid for or a credit card on file you are required to pay for hours flown the day you fly.**

Our goal is to encourage all club members to stay active within General Aviation. We have developed the above rates with that thought in mind. At the same time, we do not want to compromise the club's stability.

Monthly club due's are \$30.00 per month.

Happy and Safe Flying,

  
Rich Edwards  
Operations Director
